NetScore e-Bay Connector for NetSuite

NetScore connector that seamlessly integrates the eBay Marketplace with NetSuite

Our Customer Appreciation

"NetScore has really helped us improve our distribution system allowing for more efficient communication between our operations and sales teams which has translated into higher sales, less order drop off and ultimately happier customers and happier team members.

One of the main reasons we implemented NetScore was to meet various compliance requirements both financial and industry specific while increasing efficiency and reducing labor costs. Having the type of digital record keeping that NetScore provides us, tied to our supply chain operations, has helped us immensely in getting through financial audits and settling customer disputes."

Bradford Boulay | Sales Analyst
SHELF LIFE

"We worked with NetScore to create a very customized WMS. We are very happy The NetScore team works faster than any other 3rd party group we have ever worked with.

Weekly meetings were productive as the NetScore team was both knowledgeable and able to think of new approaches to solve our unique challenges. I highly recommend this company and SuiteApp. It works very well with NetSuite, Five stars for sure!"

Matt Grant | Vice President
SAILRITE

An Experienced Cloud ERP Solutions Team!

NetScore is an award-winning NetSuite partner headquartered in Vienna, Virginia with a strong focus on building certified solutions for the Retail and Wholesale Distribution verticals. Our Suite of applications that include POS, Delivery Routing, Rental Management and Integration Plugins are creating value for customers for over a decade. Customers value our responsiveness, trust and technical expertise in solving day to day problems, reduce operational costs and helping them grow their business during good and bad times.

"To grow our online presence, including sales and supporting our local stores, we wanted to build a robust e-commerce website with a reliable and easy to use content management system. A WordPress/WooCommerce site was our dream, but we were worried that it would be unable to connect to our inventory through Netsuite. Luckily, our trusted Netscore team had a solution: a new connector that would work similar to the Amazon and eBay connectors of theirs that we already use. Now, we could have a really great website that synced with our inventory in our distribution centers, brick-and-mortar stores and other online platforms. Throughout the entire process – from proposal and implementation to executing and support after launch, their team has been nothing short of amazing. We would recommend the Netscore WooCommerce connector to anyone interested in ditching cumbersome websites. The people at Netscore are technical geniuses, and we don't know what we would do without them."
