NetScore Delivery Routing

For NetSuite

Built for
**ORACLE NETSUITE**

Hybrid SuiteApp

NetScore Delivery Routing for NetSuite
provides a delivery solution for NetSuite customers who utilize their own delivery trucks. The solution leverages the power of NetSuite, Artificial Intelligence (AI), and the Internet of Things (IoT) provide a comprehensive platform to manage your delivery assets. The broad solution provides route planning, mobile driver assistance (including route guidance), proof of delivery, advanced notifications (text or email), real time truck location, and maintenance of vehicles.

NetScore Delivery Routing

- Get Orders From NetSuite
- Plan Routes
- Assign Drivers
- Optimize Routes
- Delivery Updates to Customers in Every Stage
- Signature Capture
- Auto Update Delivery Status to NetSuite

" Our company implemented the NetScore Delivery Routing system as part of a NetSuite ERP overhaul. The NetScore team was communicative and assistive during the development and go-live phases and met the proposed deliverable timelines. Our employees find the application intuitive and easy to use, which is critical. NetScore has improved our dispatching efficiency and streamlined our fulfillment and invoicing processes. In addition, we now provide customers real-time delivery information and photos. We have begun moving forward with additional modifications based on our customer-specific needs that will further enhance the application. We are very pleased with our decision to utilize NetScore as part of the NetSuite ERP solution. We feel the NetScore team is highly capable and has met and exceeded our expectations to date. "

Evan Moorehead | Owner
Rock Materials

RM ROCK MATERIALS

- **Route Planning / Optimization**

  The route planning capability organizes orders into routes using a rule based geo-point mapping solution

- **Vehicle Monitoring**

  A real time dashboard let's you see vehicle locations. IoT sensors can provide vehicle performance information for maintenance planning
