

NetScore Point of Sale

For NetSuite

NetScore Point of Sale (POS) for NetSuite provides a powerful application that supports customer facing sales leveraging the power of the NetSuite ERP solution. The flexibility of the cloud-based solution provides an ideal tool for use in retail point of sale environments, front counter operations, mobile retail applications, and showrooms.

Leveraging leading technologies such as the IOS and Android operating platforms, gives users a wide variety of devices to choose from for running the solution including, retail terminals, touch screen monitors, tablets, and other mobile devices. Blue tooth technology allows you to connect scanning devices, receipt printers, and credit card processing equipment. A single touch of the product icon or scan can add items to the purchase. Promotional codes, gift certificates, store credits, and loyalty reward points can all be managed during the transaction. Multiple payment methods such as cash and credit card (can be split across multiple cards) can be used against a single transaction. Returns, refunds, and exchanges can all be easily managed.

Flexible Deployment

Customers can choose from instore terminals, mobile tablets, or handheld devices to meet a variety of deployment requirements. Bluetooth scanners, wireless printers, and credit card readers expand the capabilities of the solution.

Multi-purpose Use

The solution provides POS support for in-store retail environments, and mobile applications brings your POS solution to trade shows, mobile sales staff, and showroom applications.

NetScore Point of Sale for NetSuite

Real-time NetSuite Integration

The built for NetSuite solution fully integrates with your backend system and leverages the power of NetSuite reporting and search capabilities. The application can be extended with Loyalty Rewards, CPQ, and Delivery Management capabilities.

Fully Customizable

You can leverage the power of the NetSuite customization tool sets to add fields, customized scripts and other modifications to meet your specific needs.

Features

Flexible Payment Methods:

Payments can be processed immediately through credit card (including splitting payments across multiple cards), cash or debit cards. Also supports applying promotional codes, loyalty points, store credits, and gift cards / certificates.

Manage Returns:

Full support to manage item returns (including reasons for return), exchanges, store credits, and refunds.

Customer Service:

For the retailers who want to better know their customers, order history, returns, and all other transactions are available in the customer center. This includes their Loyalty status and available points if the system is integrated with the NetScore Loyalty Rewards application.

One Touch Order Entry:

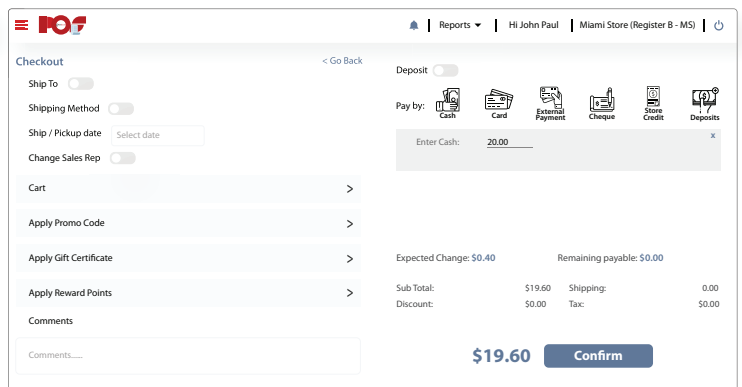

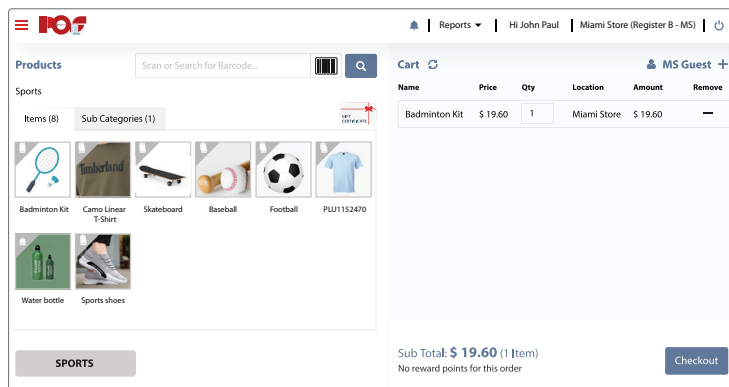

Product icons can be displayed, and items added to the order simply by touching the item or by scanning a barcode. Quotes can be generated and later turned into orders with a single key stroke.

Stock Check:

Quick search provides a full view of inventory across your distribution center and all stores.

Integrations:

Preconfigured integrations with tax engines, payment processing systems, and complimentary applications gives you plenty of options for deployment.
